### **Policy Documents of the Institute**

#### **+ Scope: -**

This is a documental strategy of the organization in terms of its action relating to the environment commitment to sustainability. We are committed to making a Positive impact on the environment by developing and implanting effective green practices and procedures are a rule, not as exception.

We are dedicated to taking the following actions to achieve our green vision.

- Reduce the amount of waste and careful disposal of produced waste.
- Increase our green Knowledge. We will ensure that this policy and all procedures relating it are understood, implemented and maintained by all institute employers and students.

#### **+ Objectives of the Policy Document: -**

- To sensitize the student's faculty and staff about green environment and sustainable development.
- To educate the students, faculty and staff about green environment and sustainable development measures.
- To adopt, enhance and promote the green initiative to minimize environmental pollution.

#### **+ Guidelines: -**

- **Energy environment and green audit: -**
- These Audits should be carried out and necessary corrective measures should be taken.
  - **Limited entry of Vehicles: -**
- The entry of vehicles in the campus is limited. Further, all the college staff, faculty members are encouraged to get an emission certification of their vehicle on timely basis.
- **Ban on use of plastics: -**
- The college continuously committed to work towards plastics free campus.

- **Landscaping with trees and plants: -**
- Plants more trees within and outside campus to clean the atmosphere and keep it green
- **Measures for energy conservation: -**
- All should ensure optimum utilization of lights, fans and other electronic devices turning them off when not in use.
- The Activation of power management systems (Power saving mode) in electronic devices like computers should be done, when not in use.
- Utilization of LED bulbs should be done as far as possible.
- The Purchase of equipment's or instruments should be made in view of energy conservation utilization of alternative sources of energy should be promoted.
- **E-learning center: -**
- All should messaging service for official communications instead of paper as far as possible. Utilization of learning management systems and e-platforms should be promoted.
- **E-Governance: -**
- Measures should be taken to promote e-governance. Printing of documents should be done back to back whenever feasible to avoid use of more papers.
- **Waste-Management: -**
- All should aptly utilize the dust bins for waste disposal made available at different locations in premises and the campus.
- All should strictly exercise separate disposal of dry, wet and electronic and biomedical use.
- **Water Management: -**
- All are required to use water cautiously.
- Suitable measures may be taken to prevent wastage of water in day to day activities. Measures of conservation of water like water recycling rain water harvesting systems etc. should be promoted.
- While developing a new infrastructure, careful planning should be done with regards to this green and environmental policy.
- All should strictly adhere to the above-mentioned rules and regulations.
